

Instructions to use Bluetooth® speaker amplifier

SWITCHING ON

1. If not ON, switch on power by turning volume control knob clockwise.
2. Press “Pair” button. **Blue LED** will flash.
3. On your Smart phone / Tablet connect to the Bluetooth device named “AA0522”

Note: You will need to do this each time you use the system.

SWITCHING OFF

Your welcome, to switch the power off if you would like to conserve power.

However, you don't need to do anything and can just leave the unit as is, ready for the next person.

Troubleshooting Tips		
Problem	Possible solution	
No Power	Make sure the device is connected/plugged into the power outlet	
	Ensure that the power outlet is switched ON	
	Confirm that the power adapter connected to the device LED is ON and lit green.	
Not able to connect/find device on Smart phone/device	Make sure that you have your Bluetooth switched on your Smart phone/device	  Example screen shots from iPhone settings
Bluetooth device found but not connecting	Switch OFF and switch ON the device by turning the volume control knob
